The aim of the Career Launch Programme is to provide students who will be entering the workplace with an opportunity to explore industries on the Isle of Man.

Students will be given a 1-1 consultation with a member of the JA team. Once the individual has identified an industry they would like to explore, they will be asked to submit a CV to JA.

JA will coordinate a mutually convenient time for the student to meet with an employer at their premises.

During this meeting, the student will have an informal mock interview with the employer and will be given the opportunity to find out more about the industry they have chosen.

The employer will provide the student with helpful feedback on their interview technique and details about the roles available.

Our Partners

JA will work with all secondary schools and employers on the island who wish to offer the programme as part of their industry and recruitment framework.

Benefits

It's a win/win!

Employers will give students an insight into the opportunities and training available on-island.

It will help students to make informed choices and promote youth-friendly organisations that are willing to give their time to help.

Whilst not essential, it may lead to a career opportunity for the student.
